

Distracted Driving Sticker Sheet

Must print on full sheet sticker or label paper and cut along trim marks.

Go Safely, California is excited to provide you with this unique and useful approach to remind you and your loved ones not to text and drive. Remember, distracted driving is the number one cause of roadway crashes. Peel and place these stickers on car windows, phones, books, planners – anywhere you can think of to remind yourself and your loved ones to put down the phone and just drive. These are especially great for young teen drivers that may need the occasional reminder stop texting while driving. Go Safely!
